## Battered and Bruised Deck

**BATTERED AND BRUISED** is an exclusive promotional card deck which forces you to replace 10 wounds with one Wound card. This Wound card describes your wound and gives you game effects and restrictions.

Whenever a player has 10 or more Wound Markers, they must draw 2 Wound cards, choose one, and discard the other, along with 10 Wound Markers. Wound cards are kept in a separate pile, in the same manner as Item  or Enchantment  cards.

A Wound card is still considered to be 10 Wounds (-10 Glory Points  at the end of the game), but also imposes some extra restrictions on a player and compensates for that with a few Glory Points .

When a player heals, they always need to discard Wound Markers first. When no Wound Markers are left and a player heals, they may discard a Wound card, replace it with 10 Wound Markers and then heal the appropriate amount.
